

Wrangle Act

By Abhishek kumar

Introduction

This analysis focuses on the tweets from the tweet archive of Twitter user @dog_rates, also known as WeRateDogs. Have you heard about one of the most famous meme of 2016 “they’re good dogs Brent” and the twitter account WeRateDogs? Probably yes, but if not. Here I can tell you a bit about it and better than that I can show you some fun analysis of WeRateDogs tweets data. First, WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. These ratings almost always have a denominator of 10. The numerators however are almost always greater than 10 (11/10, 12/10, 13/10, etc.). In theory the rates should be 1 to 10. However, WeRateDogs disagree, they admit almost all dogs deserve a 10 and sometimes more than that. WeRateDogs has over 6 million followers and has received international media coverage. One of those coverage were about the quote “they’re good dogs Brent”, this was an exchange in which WeRateDogs shut down a person having an issue with its rating system in humorous ways. So what does this rating do? Which dog type (breed) is most common dog in the tweet dataset? What dog type has the highest average rating? These questions and more are answered in the following insights:

Most Common Dog Type

The most rated dog was golden retriever with more than 160 ratings. Labrador comes next with huge gap of almost 50 counts and On the opposite end of the scale was the miniature pinscher.

Dogs according to stages

This pie chart is showing the dog stages distribution according to their Doggo Lingo (or Dog-Speak) terms. The highest one is pupper which means puppies. Least one is floofer it's all dog categories and what the tweets are describing their dogs.

Retweets

Many tweets have been retweeted more than 1000 times some more than even 50000 times. However, there is no clear relationship between the ratings and the retweets.
